QUESTION 1

Profle card with props

```javascript
//components/Profilecard.js

import React from 'react';

import "./profile.css"

const ProfileCard = (props) => {
 return (
  <>
  <div className="profile-card">
  <div className='card'>

    <img

      src="https://placehold.co/100"

      alt="profile img"

      />

    <h1>{props.name}</h1>

    <p>{props.description}</p>

  </div>

  </div>

  </>

 )
}

export default ProfileCard;

//App.js

import ProfileCard from './components/ProfileCard';
```

```
import './App.css';

function App() {

 return (

  <div>

    <ProfileCard name="XYZ" description="A passionate Web Developer and tech
enthusiast" />

    <ProfileCard name="ABC" description="a graphic designer with a love for digital art"
/>

  </div>

 );

}

export default App;
```
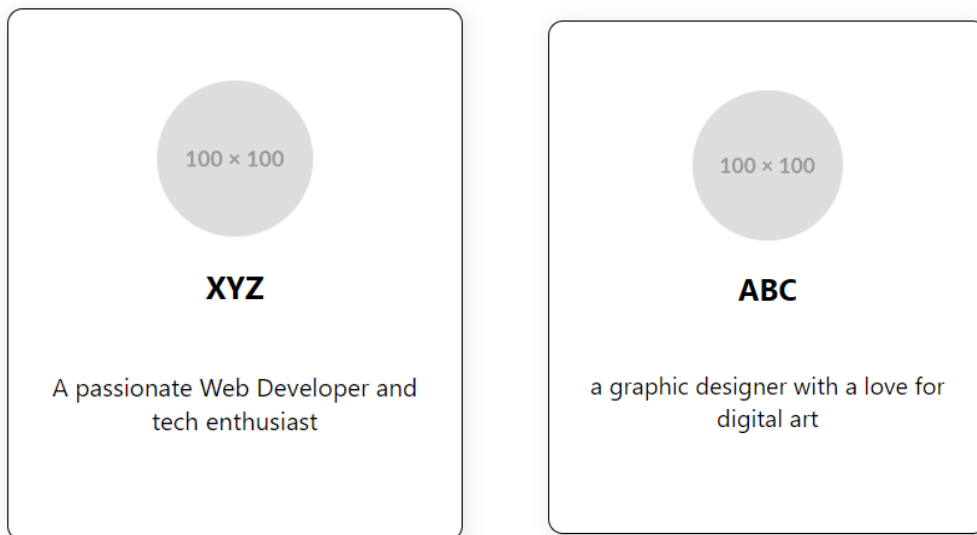

100 × 100	100 × 100
XYZ	**ABC**
A passionate Web Developer and tech enthusiast	a graphic designer with a love for digital art

s

QUESTION 2

Map function –

let arr = [1000,4000,500,2000];

let yearlySalary = arr.map(num => num*12);

console.log(yearlySalary);

```
[Running] node "d:\LPU\FRONTEND-REACT\ca.js"
[ 12000, 48000, 6000, 24000 ]

[Done] exited with code=0 in 0.208 seconds
```
